

FRONT (sizes at floor) 1:20

END 1:15

TOP 1:20

Part	Qty	Length	Width	Thickness
Top skin	1	97.00 in	30.00 in	0.50 in
Side panel – front	1	97.00 in	36.00 in	0.50 in
Side panel – back	1	97.00 in	36.00 in	0.50 in
End panel	2	36.00 in	36.00 in	0.50 in
Bottom skin	1	93.00 in	27.00 in	0.50 in
Long rib – inner	2	94.00 in	5.00 in	0.50 in
Cross rib – inner	5	27.00 in	5.00 in	0.50 in
Shelf	1	93.00 in	27.00 in	0.50 in
Total parts	14			

NOTES

1. Material: MDF. Thickness is set by Design.mdf_size (1/4, 1/2 or 3/4 in); skins, inner ribs and frame panels can each be overridden (t_s, t_r, t_l).
2. All dimensions in inches. Every size follows the Design spreadsheet.
3. Slots are drawn with the fit clearance (Design.fit) already added.
4. Corners are drawn square: add a dogbone dressup to every CAM profile.
5. Cut a test corner and one rib pair first and check every fit.
6. Seal MDF edges (shellac or thinned glue) before finishing.
7. Overall sizes are the footprint at the floor. Default leg splay (3.5 in) comes from the FEM study in fem_splay_study.py; see README.
